using CSS!

Do it one step at a time to see how the CSS works!

1

Add a solid border 1 pixel in width to the whole list

```
body {
    font-family: sans-serif;
}
ul {
    border-style: solid;
    border-width: 1px;
}
```

2

Add a solid red border 1 pixel in width to each of the list items

```
ul {
    border-style: solid;
    border-width: 1px;
}
ul li {
    border-style: solid;
    border-width: 1px;
    border-color: red;
}
```

3

Remove the bullet points from the list (lists have bullet points by default)

```
ul li {
    border-style: solid;
    border-width: 1px;
    border-color: red;
    list-style-type: none;
}
```
